

Cheshire and Merseyside Health and Care Partnership

Memorandum of Understanding (Tier Zero)

Health and Social Care

Memorandum of Understanding (Tier Zero)

The organisations signing this Memorandum of Understanding (Tier Zero) recognise a collective responsibility to minimise the burden of data collection and to ensure that data collected is done so lawfully, and is used effectively, to support the overall aims of all partner organisations within the Cheshire and Merseyside Health and Care Partnership. This Memorandum of Understanding is part of a framework designed to support information sharing initiatives within Cheshire and Merseyside where the primary aim is to support the provision of Direct Care.

Nationally, organisations involved in the commissioning and provision of health and social care services are identifying substantial requirements to share and use Personal Confidential Data (PCD) in order to:

- Deliver safe and effective direct care to service users supported by information held by other organisations
- Plan and organise appropriate care/services for people
- Deliver planned improvements in care delivery and financial efficiency
- Protect vulnerable people from harm

The increasing need for organisations to appropriately share information is emphasised in:

1. The addition of a seventh Caldicott Principle in 2013; “The duty to share information can be as important as the duty to protect patient confidentiality“
2. The introduction of the Health and Social Care (Safety and Quality) Act 2015; which sets out a legal duty requiring health and adult social care bodies to share information with each other for the direct care of individuals.

We are committed to the following principles:

- Data will only be shared and processed where there is a legal basis to do so.
- Data should be collected once, shared appropriately and used in a way which is compatible with the legal basis.
- Collection and sharing of data should be fully supported by a Data Protection Impact Assessment (DPIA).
- To ensure the security of data when stored and during transmission.
- All staff with access to shared data will undertake Data Protection training at least once per year, and that the training will also ensure that staff groups are aware of their personal responsibilities in relation to the use of personal data.
- The organisation will have in place appropriate policies and procedures that ensure data is only used, processed and stored in a way which is compliant with the GDPR Data Protection Principles.

I, _____ agree that as the
for _____ we are committed to the key
principles of this strategic Memorandum of Understanding (Tier Zero).
